TARIKUL ISLAM

Cybersecurity Researcher | Vulnerability Research & Penetration Testing

Birmingham, B4 7DR, United Kingdom | +44 7404 324075 | sa1tama0@yahoo.com

linkedin.com/in/sa1tama0 | sa1tama0.com

PROFESSIONAL SUMMARY

Cybersecurity researcher with 8+ years of experience uncovering and reporting high-impact vulnerabilities across web, mobile, API, and cloud environments, with over 200 validated disclosures and sustained top-tier performance on Synack, Bugcrowd, HackerOne, and Yogosha. Skilled in protocol and network analysis, custom tooling and automation (Python, Bash), and structured vulnerability research methodology, with foundational, self-directed exposure to static binary analysis (Ghidra). Currently studying for an MSc in Cyber Security at Birmingham City University. Seeking to bring a research-led, curiosity-driven approach to complex security challenges within a mission-critical or regulated environment, and open to undertaking UK National Security Vetting (NSV) for DV clearance.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Vulnerability Research:** Web & Mobile Application Security, API Security, RCE, SQL Injection, IDOR, XSS, Authorization Bypass, Privilege Escalation, Subdomain/Domain Takeover
- **Network & Protocol Security:** Network Traffic Analysis, Protocol Analysis, Attack Surface Mapping, OSINT & Reconnaissance
- **Reverse Engineering (self-study):** Foundational exposure to static binary analysis with Ghidra through self-directed study; developing familiarity with disassembly and binary internals
- **Scripting & Automation:** Python, Bash, C, SQL; custom Nuclei templates and automation for reconnaissance and fuzzing
- **Cloud Security:** AWS, Azure, Google Cloud — penetration testing, IAM review, security misconfigurations, CSPM
- **Tools & Platforms:** Burp Suite, Nmap, Metasploit, Wireshark, Nessus, Autopsy, Shodan, Belkasoft
- **Defensive Security:** Incident Response, Digital Forensics, Threat Hunting, Log Analysis, Risk Assessment

PROFESSIONAL EXPERIENCE

Cyber Security Analyst | Disclosify Ltd *Feb 2025 – Aug 2026*

- Perform structured technical risk assessments, threat analysis, and security evaluations across client environments.
- Analyse complex software and network architectures to identify security flaws and recommend mitigation strategies.

Strike Force Member | Yogosha *Nov 2025 – Present*

- Conduct research-focused security audits and penetration tests against complex corporate targets and digital assets.
- Identify complex logic errors and high-impact vulnerabilities, delivering clear technical documentation and proof-of-concepts.

Synack Red Team (SRT) Member | Synack *Dec 2022 – Present*

- Active member of the elite Synack Red Team, conducting continuous security assessments against vetted enterprise targets.
- Identified and reported critical vulnerabilities including SQL Injection, IDOR, and XSS; performed extensive patch verification cycles to confirm remediation.
- Ranked 4th all-time among Bangladesh-based SRT members, with an 80% submission acceptance rate and only 10% duplicates.
- Built custom Python/Bash scripts and automation templates to improve attack surface discovery and fuzzing efficiency.

Independent Vulnerability Researcher | Self-Employed / Responsible Disclosure Programs *Nov 2019 – Present*

- Participated in responsible disclosure programs for major technology companies including Microsoft, Intel, Zebpay, and Shift Crypto.
- Identified and documented critical vulnerabilities including SQL Injection, Blind SQL Injection, RCE, XSS, IDOR, Authorization Bypass, Admin Panel Bypass, and Privilege Escalation.
- Submitted over 200 validated vulnerability reports, achieving a 75% acceptance rate with 20% duplicates across diverse platforms.
- Built custom scanners and Nuclei templates to automate discovery of novel attack vectors.

Security Researcher | BugCrowd *Mar 2020 – Feb 2023*

- Discovered and reported vulnerabilities including Blind XSS, Domain Takeover, CSRF, and Account Takeover.
- Earned Hall of Fame recognition from organisations including Cisco, Dell, Office Depot, GoPro, and BugCrowd.
- Sustained a 60% acceptance rate with 30% duplicates.

Security Researcher | HackerOne *Sep 2018 – Oct 2022*

- Conducted in-depth security research on web applications and services, focusing on Subdomain Takeover, DOM XSS, RCE, Account Takeover, SQL Injection, and Open Redirect.
- Earned Hall of Fame recognition from Meta, Reddit, Coursera, Pfizer, Global Payments, inDrive, and Ubiquiti Inc.
- Achieved a 70% acceptance rate with 20% duplicates.

EDUCATION

MSc in Cyber Security — Birmingham City University, UK (In Progress)
BSc in Computer Science and Engineering — Green University of Bangladesh
Diploma in Engineering, Instrumentation & Process Control Technology — Shariatpur Polytechnic Institute

CERTIFICATIONS

- Certified Application Penetration Tester (CAPEN) — The SecOps Group, 2025
- Multi-Cloud Red Teaming Analyst — CyberWarFare Labs, 2024
- Android Forensics with Belkasoft — Belkasoft, 2024
- Certified AppSec Practitioner (CAP) — The SecOps Group, 2023

CTF COMPETITION ACHIEVEMENTS

- Champion — Cyber Security Summit Hackathon 2021
- Champion — University Cyber Drill 2021
- 1st Runner-Up — The Phoenix Summit
- 2nd Runner-Up — SUST SWE TECHNOVENT CTF 2023
- 3rd Place (Team) — CTFBD: Maze in Antarjal
- 4th Place (Team) — National Cyber Drill 2021
- 5th Place (Team) — MIST LeetCon 2023
- 5th Place (Team) — National Cyber Drill 2022
- 11th Place (Team) — University Cyber Drill 2022
- 94th Place (Team) — Cyber Apocalypse CTF 2021
